

Amit Divekar

Full-Stack Engineer | Cloud & AI Systems

Nashik, Maharashtra, India | amitdivekar289@gmail.com | linkedin.com/in/divekar-amit | github.com/amitdevx
| amitdevx.tech

Education

Savitribai Phule Pune University

2024 – 2027

Bachelor's Degree in Computer Science

SGPA: 8.36/10.0

Coursework: Programming Fundamentals, Data Structures & Algorithms, DBMS, Computer Networks, OS

Technical Skills

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Prometheus, Grafana

AI & Multi-Agent: Python, LangGraph, Genkit, Pydantic, Google ADK, Multi-Agent Systems, Pandas, NumPy

Frontend: TypeScript, React.js, Next.js, JavaScript, Tailwind CSS, Framer Motion

Backend & Tools: Node.js, FastAPI, PostgreSQL, Redis, Git, Playwright, npm, SQLite, Figma

Experience

Independent Developer

2022 – Present

Self-Directed

- Built and shipped personal and open-source projects while learning full-stack development, cloud infrastructure, and DevOps tooling
- Published and maintain the open-source npm package @amitdevx/md2pdf, alongside several self-initiated AI and automation projects

Electronic Arts (EA)

Jan – Feb 2025

Software Engineering Virtual Experience

- Wrote a feature proposal, designed a C class diagram, and fixed a significant bug in the EA Sports College Football codebase
- Improved application performance by replacing a data structure with a more efficient one

Accenture UK

Oct – Dec 2024

Developer and Technology Virtual Experience

- Researched DevOps practices and compared Waterfall vs. Agile methodologies as part of an SDLC deep dive
- Designed and optimized a Python program to improve system functionality

Scaler

Apr 2024 – Jul 2024

Software Development Program

- Completed a structured, cohort-based course in software development fundamentals and data structures & algorithms
- Practiced algorithmic problem-solving and core programming through weekly assignments and peer reviews

Projects

@amitdevx/md2pdf | GitHub | npm

Node.js, TypeScript, Chromium, Playwright, Unified, npm

- Built an open-source CLI tool and Node.js API that converts Markdown to high-fidelity PDFs using headless Chromium
- Added support for Mermaid diagrams, KaTeX math, Obsidian callouts, custom themes, and batch conversion

SelfHealOps | GitHub

Python, NVIDIA NIM, LangGraph, FastAPI, Redis, Prometheus, Grafana

- Built a self-healing DevOps agent that runs on a hierarchical multi-agent system
- Automated classification, analysis, and remediation of CI/CD pipeline failures and infrastructure issues

SchemaSense AI | GitHub | Live

Next.js, FastAPI, Python, PostgreSQL, DeepSeek-V3

- Built an AI database documentation platform that auto-generates schema docs and maps table relationships
- Added a plain-English query interface with prompt injection defense and streaming responses
- Cut response time by 56x by adding an intelligent caching layer

Professor Profiler | GitHub

Python 3.11, Gemini 2.0 Pro, Llama 3.3 70B, Multi-Agent Systems

- Built a multi-agent system that reverse-engineers exam papers to identify professor-specific patterns
- Coordinated multiple LLMs to analyze past exams and generate targeted study strategies

Certifications

AWS Cloud Practitioner – GeeksforGeeks

Aug 2026

AI Agents Intensive Course – Google & Kaggle

Dec 2025

Trust and Security with Google Cloud – Google

Aug 2025

Career Essentials in Cybersecurity – Microsoft and LinkedIn

Jul 2024
